1. As of 20 September, 2000 workers of Bau Union Sued were still employed on the airfield construction project at Jocksdorf. The site is guarded by a detachment of about 50 KVP's.
2. The runway, the concreting of which has only recently been resumed, is laid out in a wooded section where a clearing 200 meters in width has been prepared and levelled. Despite the acquisition of four concrete-laying machines, the concreting of the runway is being slowed because of a serious shortage of cement. As of 20 September, an area of about 1500 x 40 meters had been covered by a 30 centimeter thick layer of concrete.
3. The wire fence which had been removed from the northwest perimeter of the airfield in August has not yet been replaced. Farmers are still permitted access to the land which had been requisitioned as part of the airfield project.
